

MVLU COLLEGE

OUTPUT:

A* SEARCH(LETTERS):

The screenshot shows a Google Colab notebook titled "T112 Shaikh Anshrah Practical 2 A* Search letters.ipynb". The code cell contains the following Python code:

```
path, cost = a_star('A', 'H')
print("Shortest Path:", " → ".join(path))
print("Total Cost:", cost)
```

The output of the code is:

```
Shortest Path: A → B → D → H
Total Cost: 13
```

The right sidebar shows the Gemini chat interface with the message "Hello, T112 Anshrah" and several suggested actions: "How can I help you today?", "How can I install Python libraries?", "Load data from Google Drive", and "Show an example of training a simple ML model".
